

Energy Policy

Arthur Cox is committed to making efficient use of energy throughout its activities at its Dublin offices (Ten Earlsfort Terrace), with the purpose of conserving natural resources and reducing carbon emissions thereby doing its part with regard to climate change mitigation. The facilities management team will lead and promote Arthur Cox's energy efficiency programme in accordance with the ISO50001:2018 energy management systems standard by:

Articulating and setting energy saving initiatives, objectives and targets on a regular basis with a view to continuously improving our energy performance and the energy management system

Resourcing the energy management system with the availability of information and other necessary resources to achieve our energy objectives and targets

Taking a commitment to ensure that all legal and other requirements relating to energy efficiency, use and consumption are complied with

Having the processes in place to support the procurement of energy efficient products and services that impact energy performance, as well as ensuring that any design activities, renovation or building works, consider energy performance improvement

Undertaking to communicate the energy policy to staff within the organisation as well as interested parties, as appropriate

Reviewing this policy on a regular basis to ensure it is appropriate to the nature and scale of the organisation's energy use and consumption, updating as necessary, and making it available as documented information
